

# PINAO'ULA FINGER PUPPET

## PINAO'ULA FINGER PUPPET DIRECTIONS

1. Cut out pinao'ula body and wings.
2. Center the wings to the pinao'ula body on the white 'X'.
3. Bend the ring bands down and overlap bands to form a ring. Tape overlapping pieces.

### ALL ABOUT PINAO 'ULA

#### INTERESTING FACT

Pinao 'ula have two large compound eyes composed of multiple tiny facets that provide a wide range of vision and lace-like wings to help them explore!

#### WHAT'S ON THE MENU?

Pinao 'ula are **SKILLED** predators because they are able to navigate sharp turns and reach out with their front legs to catch smaller insects while flying. They feed on a wide diversity of **insects** and small **snails**.

#### HOME IS WHERE THE STREAMS ARE

Pinao 'ula lay their eggs in water. The larvae (young stage of pinao'ula) are found among large stream rocks and boulders, while the adults fly along the stream corridors, wetland areas and also upland forest.
